Eoin Ocathasaigh Data Centric Project Innovations

My Innovations

- Added a specific section to the add student & editing student page for errors to appear in – as opposed to them just constantly being there or popping up out of nowhere
- Added some basic css to the addition & edit pages for students to try and make them look a bit nicer – css files wouldn't work for whatever reason so I did them manually
- Added some basic formatting to all pages – aligning content in the centre of the screen for better visibility and for a better user experience.
